# The Genuine Custom Made Garage Door Professionals

## Flush Mounted Doors

Custom Made Garage Doors are again leading the market in Christchurch and Nationwide with its Flush Mounted Garage Doors.

The Flush Mounted Garage Door blends in with the exterior cladding of the architecturally designed home giving it a clean appearance.

The Garage Door can be clad in contrasting material to match the house whether it be Cedar, Alucobond, Flat Panel, Negative Detail or any other material.

The Flush Mount finish can be flush between Garage Doors, above the doors and at the sides.

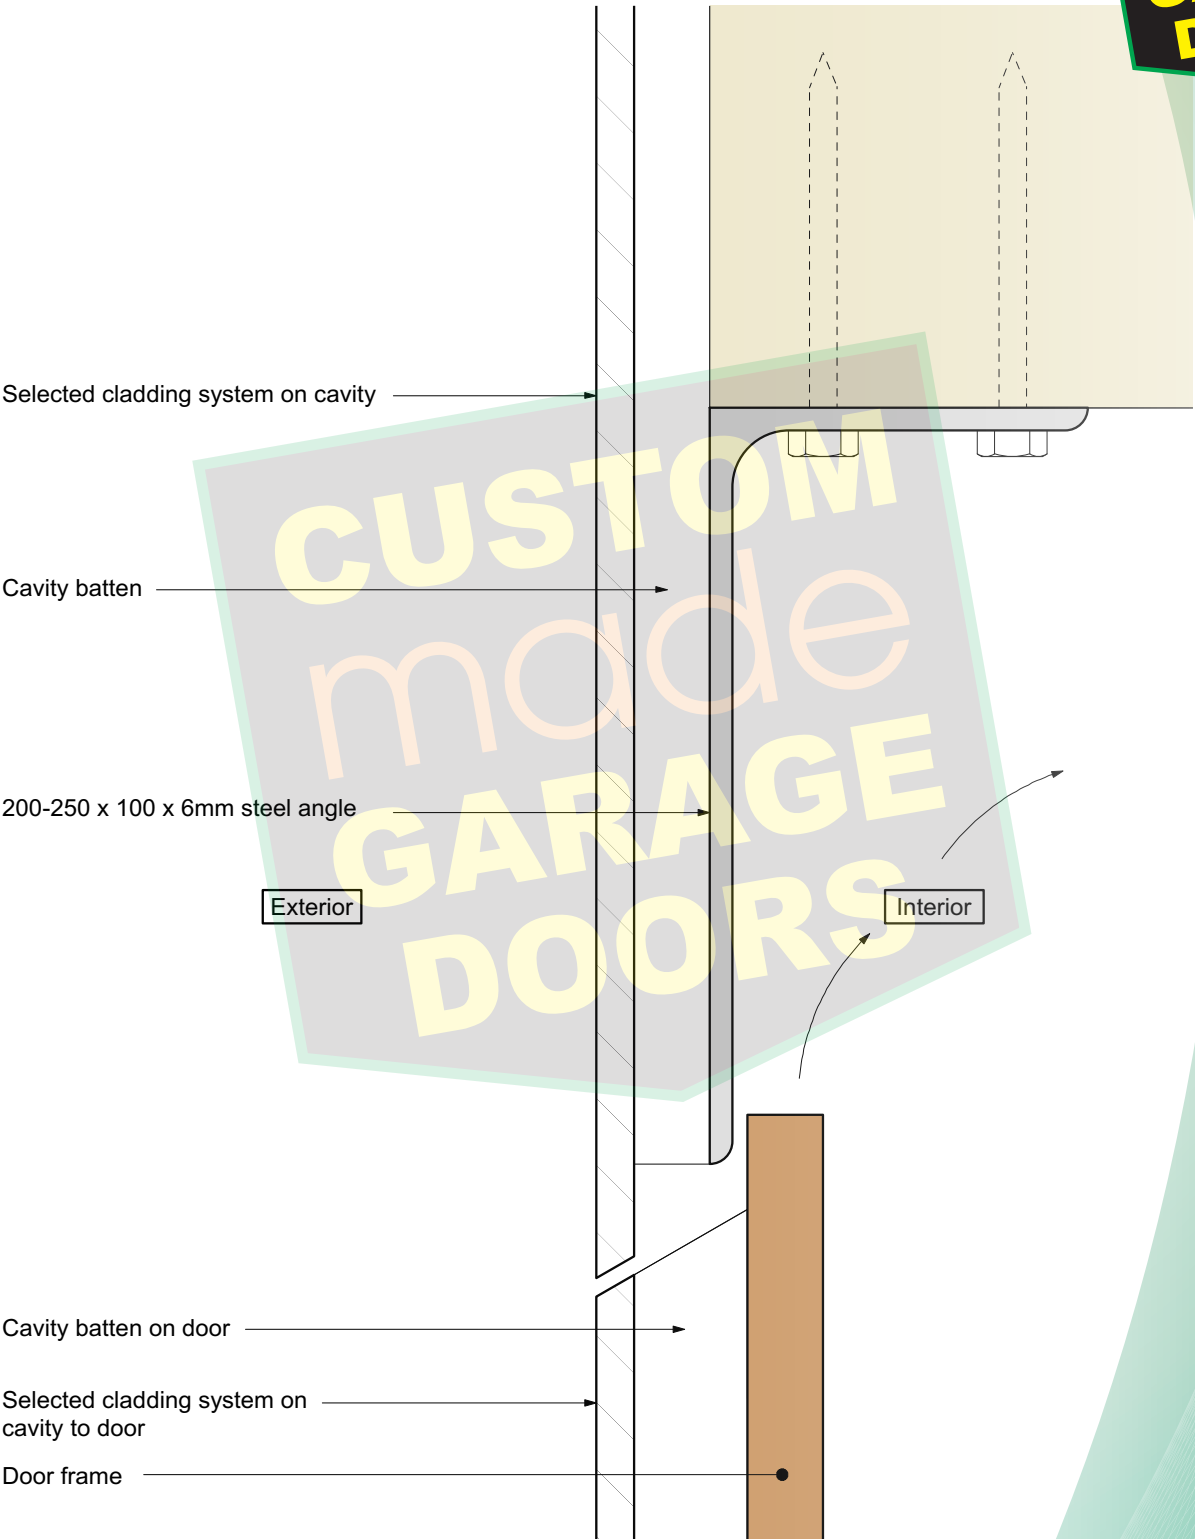

We will work in with the architects on their requirements

# Head Detail

TM

© COPY RIGHTED

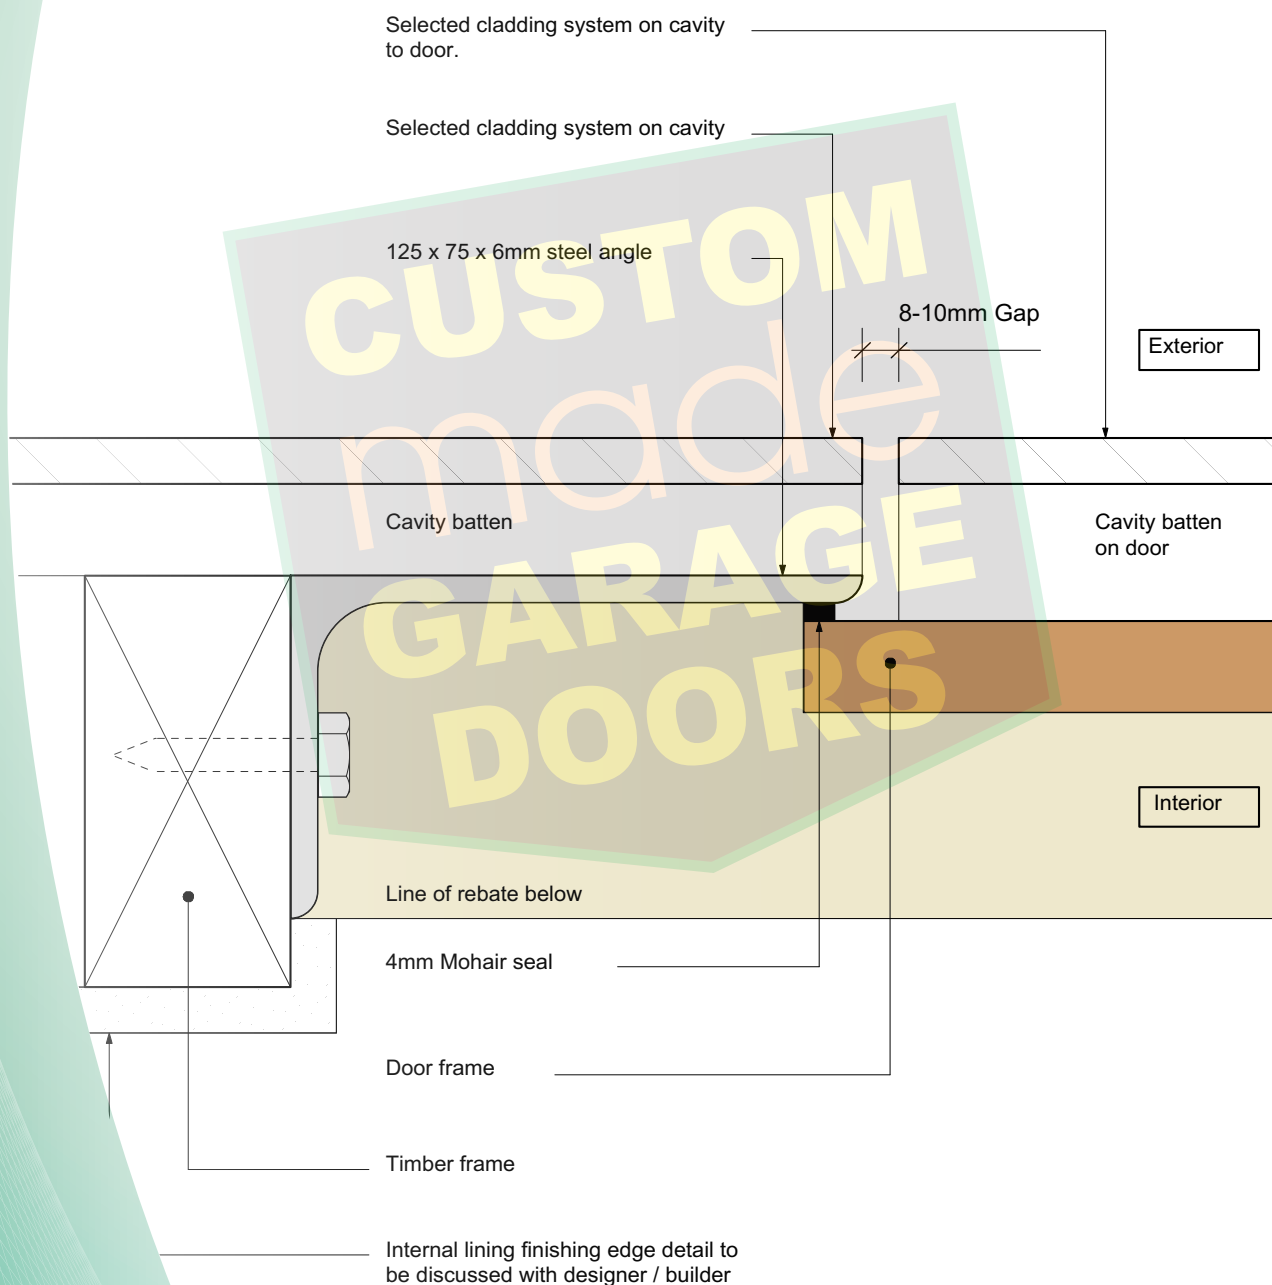

The drawing shows the cladding on the building protruding down past the steel angle and cavity batten by about 35mm creating a cavity void allowing the door to operate without any interference with the steel angle.

The gap between the door and cladding on the wall is recommended 5mm-10mm. Both are cut on a 30 degree angle to allow room for the door to pull back.

# Side Jamb Detail

© COPY RIGHTED

The drawing shows the wall and door in the same line. If you require a Flush Mount look only at the head then the side details would change.

There are variable options in the side details depending on design.

Please contact Custom Made Garage Doors for these details.
